

The Buddy chair is for individuals who require minimal levels of postural support when seated. It has a simple, yet uncomplicated design that is ideally suited for use in Nurseries, Schools and the home environment.

The Buddy chair can be adjusted to suit an individual's size; it also has a range of accessories that can be added to ensure that the chair can be finely tailored to suit the postural needs of the user.

The Buddy seat is manufactured from black polypropylene which is extremely durable and easy to clean thus helping to reduce the risk of contamination.

The Buddy seat is manufactured in six sizes which are compatible with other School furniture that has been produced to the ISO BS 1729-1&2 Standard.
