MY-LYTE DISCOVERY BUGGY

The My-Lyte Discovery is a hybrid buggy incorporating the popular tried and tested Shuttle Discovery seat unit onto the new My-Lyte base - a highly durable and lightweight outdoor pushchair frame manufactured by RMS.

The My-Lyte Discovery incorporates seamlessly into your child's daily routine, whilst providing superior postural support. With some of the smallest sizes available on the market for early intervention, this good-looking buggy breaks the norm of special needs medical buggies, giving parents an attractive and easy to use alternative.

The modular design can be easily altered with a wide range of parts and accessories, perfect for if the child's needs evolve over time. All attachments have easy access zips so covers can be removed for simple machine washing. There is also a 'wipe-down' fabric option for messy children!

KEY FEATURES

- > Choose from a range of highly modular supports and accessories to promote better posture
- > Easy to clean covers for any spills or accidents!
- > 90° to 160° tilt-in-space and 30° backrest recline
- > Sleek compact design that folds for easy transport
- > Crash tested to ISO-7176-19 for advanced safety

THE MY-LYTE FOLDING FRAME

A result of extensive development - The My-Lyte frame was designed specifically for the Shuttle Discovery seat unit by our in house team of rehabilitation experts.

With concepts based off our amazingly successful Marley Buggy - an industry leading postural rehab buggy - the frame of the My-Lyte is extremely lightweight, folds in one smooth motion and will fit into the boot of most cars, thus making life easier for the parents who use it.
