**BIRILLO**

# Emotions in motion.

**Birillo** by Ormesa is a **walker for children** with disabilities designed to allow autonomous movement in sitting position.

Its **peculiar shape and bright colors** characterizing the **self-extinguishing upholstery**, make it a fun and stimulating aid and a valuable tool for rehabilitation activities.

PRODUCT  
MARKED **CE**

BIRILLO is a MEDICAL DEVICE THAT COMPLIES WITH THE SAFETY REQUIREMENTS defined with the REGULATION (EU) 2017/745

# Modeled on you

## Available in 4 sizes

**Birillo** is an extremely helpful aid for **the exploration of the surrounding environment**, which instantly shift from being a visual and static space to a territory of discovery. **Thanks to Birillo, the child can enrich his wealth of experiences and increase his cognitive and relational repertoire, increasing body and space awareness.**

**With Birillo, safety and fun go hand in hand.** The triangular shape of the seat gives stability to the pelvis and trunk, favoring a functional position to the use of the lower and upper limbs. Thanks to these features, it **stimulates the correct posture of the child without inhibiting the rotation of the trunk**, favoring the management of movement through the arms. The correct posture prevents deformities and favors the generation of motor schemes, essential for a **rich and meaningful interaction with the physical and social environment.**
