NEW! LIFEGLIDER

HANDS FREE “FALL-SAFE” MOBILITY

LifeGlider® is the ultimate new mobility aid for users with balance issues, with proven life-changing results.

The LifeGlider® provides upright, hands free mobility meaning there is no more looking down while walking; instead the user is engaged and focussed on life ahead.

For those that need a little rest, the LifeGlider® comes with a soft cushioned seat so small breaks can be taken.

If you would like to learn more, or watch some amazing video of the LifeGlider® at work, **simply type ‘Life Glider’ into Google and click onto the first result!**

NEW! VIRTUS HIGH LOW POWERED BASE

New for 2023 - our new powered high low indoor base has been designed to meet the rigorous requirements of classroom or home use.

- **Up to 50 powered lifts per charge**
- **30° of forward and back power tilt**
- **120kg combined seat and user weight limit**
- **Direct interface to our popular Virtus Seating**
- **Plus options for third-party seating interface**

Manufactured with the care giver in mind to promote ease of handling, ease of use, plus the ability to stand in front of the user and maintain eye contact during all seating adjustments.

The specialist powered height actuator used in the **Virtus High Low Powered Base** has a height adjustment range of 25cm from lowest to highest allowing it to fit under most standard classroom furniture.

NEW! RMS PRODUCTS

As part of our high quality **VIRTUS SEATING RANGE**, the Virtus High-Low Base has a direct interface to our postural Virtus Seating, with everything delivered as one easy-to-use package. Simply plug in and go!

The Virtus High Low Base can also be interfaced to virtually any third-party seating system, providing a high quality powered base for your seating solution.

Can be used when plugged in with a cable length of 1.25m		
Comes with storage basket for when charge cable is not in use		

NEW! ELECTRO WING

On the subject of innovative powered solutions, RMS would like to introduce the **Standy Electro Wing** from Ormesa in Italy.

This cutting edge stander has been specially designed to facilitate the maintenance of a vertical posture during all standing activities. The modern frame has a functional design that helps to compensate the users own standing muscles, either during those activities or when transferring users from a seating to a standing position.

The product has an electronic push-button panel that allows users to configure the device in both a manual or automatic mode - offering more control and independence whilst transferring between equipment.

Users or carers can fully adjust the pelvis, chest, head, backrest and footrests - minimising the workload and effort required on a daily basis.

NEW! KAYE POSTURE CONTROL WALKER

With renowned Shropshire based mobility company **Quest 88** entering into liquidation at the end of 2022, RMS Limited are now the exclusive UK distributor of the **Kaye Posture Control Walker**.

In partnership with Kaye Products America, this lightweight frame has been designed to make walking motions less energy-consuming by providing a stable foundation for basic walking needs, whilst improving the users postural alignment and gait training by offering a wide range of high quality accessories.

As a walking frame that is well known within the industry, this versatile piece of equipment offers barrier-free design to help improve interactions with the end users environment.

You can find out more about this walker by calling us on **01795 477280** or visiting our interactive website at **www.rms-rehab.co.uk**.

STANDSURE RESULTS

If you saw the last edition of our Autumn 2022 newsletter you might remember Brandon's journey with his sit-to-stand therapy sessions.

We shared his progress as Brandon began his therapy sessions with **StandSure**, our new sit-to-stand therapy tool, and experienced some great results in a short period of time by including the tool in his daily routine exercises.

We have had some great news - Brandon is now walking and able to support his own weight while standing! We couldn't be happier and are so proud to have been part of his journey. **Well done Brandon!**

TESTIMONIAL FROM BRANDON'S MUM

"We have been trying different ways to successfully make him stand on his own by holding his hand or holding an object, but it just doesn't give him comfort. With StandSure he can free stand watching his favourite cartoon and we noticed from week one he started from one minute and now, we're in week four and he can free stand for six minutes! It is huge progress! I am positive that in time he will be able to free stand on his own!"

STANDSURE FIELD TRIAL REPORT

As part of our new product process, we produce field trial reports to show data on a patient that has trialled equipment over an extended period of time.

Brandon was the perfect candidate for this, and you can read his full story with Therapist recommendations in the new StandSure field trial report on our website. Just visit:
